Serial No

Credit of the Municipal council according to the Budget for 1923-1924 is about Rs 99,000 and this may be utilized for immediate expend during the year

2. Excluding this amount, the Municipal council has still to pay Rs 1,37, They have asked for permission to raise a loan for this purpose from the public at 6% interest The amount appears to be too small for a public loan and the interest offered is not attractive In case of Kolar Govt themselves framed a loan at 7% interest for the improvement of water supply In the case of Bangalore also, the grant of a loan by Govt at 7% would be an easy mo of disposing of the question

3 In this connection government have to decide how and when they should pay the contribution of Rs 2,36,000, on account of the water supply Scheme The Chief Engineer says that it would take 2½ years to complete the works Roughly Govt have to contribute

Note—Contn sheet

Water supply to the Tumkur town.

ORDER OF THE COUNCIL.

The project and estimates for the water supply scheme to the Tumkur town as prepared by the Public Works Department may be sanctioned subject to scrutiny by an outside expert. A grant equivalent to half the cost of the scheme may be made by Government, payment commencing from the year 1925-26, on condition that the Municipality finds the other half from its own resources and loan to be raised for the purpose and that the Municipality agrees to pay Government the difference between the wet and dry assessment on the extent of land converted into dry. The expenditure in the next year may be met entirely from the Municipal funds.

Dewan

8 . 1924

Final Note by the First Member of Council

Subject —

Water Supply to Tumkur Town

Reference is invited to the Final Note dated 27th March 1919 submitted by me as Temporary Member of Council regarding the Water Supply Scheme for the Tumkur Town and to Government Order No R 14736-38/M1 224-15 -7 dated 17th May 1919 according administrative sanction to the Scheme of Water Supply from the Maidala Tank, one-half of the initial outlay being borne by Government and the other half by the Municipal Council and directing that the rough estimate of Rs , be revised by the Sanitary Circle and detailed plans and estimates submitted for the approval of Government

In October 1920, the Chief Engineer forwarded for sanction of Government a revised project for the work estimated to Cost Rs 4,00,000/- The Municipal Council, Tumkur, to whom the project was referred for consideration, stated that towards the contribution of Rs 2,00,000/- payable by them, a sum of Rs 70,000 could be paid immediately and solicited sanction to raise the balance of Rs 1,30,000 by loan. Govt however ordered in December 1921 that on account of financial stringency they were not then in a position to make an allotment for their share of the cost and that until they were able to do so, it was not advisable to pursue the matter further This order was repeated in July 1922 when the Municipal Council pressed for a reconsideration of the matter

The Dewan having, during his visit to Tumkur in August 1922, promised to sanction the scheme for starting work during the year 1923-1924 if the Municipal contribution was paid at once, the Municipal Council resolved in September 1922 to contribute Rs 80, r immediately

and to start the work from their share at once and further resolved to raise a loan of Rs 1,00,000 at 6% interest In considering -- whether sanction could be accorded to these proposals of the Municipal Council, an enquiry was made of the Public Works Department under the Dewan's orders, as to whether the estimate of Rs 4 lakhs might be taken as final and what time the project would take for completion. The Chief Engineer sent up a revised estimate for - Rs. 4,72,000 and stated that the work could be completed in 3 years or in 2½ years if funds could be provided

I visited Tumkur in August last and discussed the question of the Water Supply Scheme with the Chief Engineer, the Deputy Commissioner and the Municipal Councillors at a special meeting convened for the purpose, the ryots and other inhabitants of the villages near Maidala Tank, who have all along been opposing the scheme, being also allowed to be present The details of the Scheme and the Ways and Means for meeting the Municipal share of the cost were fully considered at the meeting and the representations of the ryots also heard I also inspected the Tank itself in company with some of the Municipal Councillors, the Deputy Commissioner, the Executive Engineer and some of the ryots owning lands under the tank

When the connected papers were submitted to me on my return to Head Quarters, I recorded the following minute on 26th September 1923

"There is no difficulty for expenditure during the current year The Municipal Council has at its credit a sum of nearly one lakh of rupees and is prepared to place a sum of Rs 80,000 at the disposal of the Public Works Department at once The work may be completed in about 2½ years and the Government may pay their quota in the next two years

The land holders under the Maidala tank object to its utilisation for water supply I do not think that there will be insufficiency of water to irrigate the valuable areca nut gardens of the thmpandra village, but some lands in the tail end will suffer

from a deficiency of water and they will have to be converted into dry The Executive Engineer in his report dated the 17th July 1923 says that the water in the tank will be sufficient to irrigate 700 acres as against an Atchkat of 1147 acres About 447 acres of wet land will have to be converted into dry But in the estimate provision is made for compensation for 150 acres only and the Chief Engineer calculates a loss of 600 rupees of revenue to the Government every year, probably at the rate of 4 rupees per acre The discrepancy in the figure will have to be explained But this may not stand in the way of sanctioning the project or the floatation of the loan "

L. After ascertaining from the Deputy Commissioner, Tumkur District, that the provision of Rs 45,000 for compensation in the estimates is ample, the Dewan recorded the following minute -

Note

"This is one of the most urgent Town Water Supply Schemes requiring to be taken up on the general promise of Government to pay ½ This they have done in other cases The Scheme is now completed after necessary investigations

On the basis of the estimate of 3 lacs, I promised to give 1½ from Government, Municipality finding the other 1,50

They are prepared to pay cash down 80,000 which may be supplemented by a grant of 20,000 next year's budget The remaining expenditure may be met in 1925-26

Municipality	one lakh
Government	50 thousand

In 1926-27

Remaining portion of	Municipal Share
do	Government share

Government may pass the estimate on the understanding Municipality pays half, from cash and loan The latter may also be sanctioned "

The whole question was considered at the meeting of the Council held on 27th March 1924 and the following resolution was recorded -

"The project and estimates for the water supply scheme to the Tumkur Town as prepared by the Public Works Department may be -

sanctioned subject to scrutiny by an outside expert A grant equivalent to half the cost of the scheme may be made by Government payment commencing from the year 1925-26, on condition that the Municipality finds the other half from its cash resources and loan to be raised for the purpose and that the Municipality agrees to pay Government the difference between the wet and dry assessment on the extent of land converted into dry The expenditure in the next year may be met entirely from the Municipal quota "

The resolution of the Council may be graciously approved

Routine Notes

[To be used only for notes, requisitions etc, not intended for permanent record.]

D 1320-23

Petition of 1-9-23 from the residents of Kyatasandra and the surrounding villages of Tumkur, protesting against the utilization of Maidala Tank water for water supply to Tumkur Town.

Subd

The question of water supply to Tumkur Town is pending with the Chief. The grievances of the ryots are being considered in that file Hence no action seems to be necessary on the present petition

SHH
18/9/23

Has not the file been summoned back

29/9/23

The connected file was submitted to Dewan on 29/9/23 The return of this file may be awaited

G.R.S. III—8]

Routine Notes.

[To be used only for notes, requisitions, etc., not intended for permanent re-

There are petitioners presented to the First Member by the holders of wet lands under the Mandalak Tank They say that they are paying a land revenue of about Rs 7000 on their wet lands and that the supply of water to their lands will suffer materially if the waters of the Mandalak Tank is used for the water supply of Tumkur known and that they would be put to considerable trouble thereby They therefore request that this scheme of water supply may be abandoned and that Tumkur may be supplied with water from a reservoir to be built near Devarayapatna across the river Jayamangala which is about 4 miles from Tumkur They have also made a personal representation to the Member during his last visit to Tumkur.

N. B.—Should routine notes be written on small slips, the latter must be stuck on slips pasted on this form.

TUMKUR DISTRICT

(*Nos. 1 to 8*)

(Local Self-Government.)

Tumkur Taluk.

	Summary of Representation.
No. 1 Water-supply to the Tumkur Town. Messrs. G Anantharajappa, B Anantha Lakshminaranappa and Veerappa Gowda *alias* Veerappaji, Tumkur Taluk.	The question of water-supply to the Tumkur town may be considered early and the work taken on hand.

The Dt. was asked to inform the Municipality of Tumkur to digest the construction of water works which Govt are willing to contribute a portion of the cost

Please put up a copy of the Dewan's reply to the address of the citizens of Tumkur

Reference is invited to the Dewan's reply to the address presented by the citizens of Tumkur on 18th August 1922 in which it has been stated that if the Municipal Council make a definite proposal to place Rs 80,000 in cash with Govt and finance the remaining Rs 70,000 either by raising a loan or by any other means, every endeavour will be made to get the scheme sanctioned by Govt and moneys for the Govt contribution

resident Tumkur

presented

by the Tumkur Municipal Council

I desire to put before you now a feasible plan and I wish that during my stay here, the President and the Members of the Municipal Council will kindly make it convenient to meet and informally discuss the scheme and the plan that I put before you The scheme is expected to cost roughly about 3 lakhs of rupees It is possible that it may cost more The last estimate went up to the figure of 4 lakhs but I fancy that that was owing to the very high price or materials that was prevailing at the time in the market and that the estimate could now appreciably reduced in view of the fall in the price of those materials at the present time Taxing therefore, a more or less average estimate for the work under contemplation, the Municipal Council has to finance 50 per cent of 3 lakhs I presume that they are ready to do it I understand also that they have got Rs 80,000 in cash deposited in the Mysore Bank as a fixed deposit They want another Rs 70,0(It struck me that if the Municipal Council make a definite proposal that they will place the Rs 80,000 in cash in the hands of Government and finance the remaining Rs 70,000 either by raising a loan or by any other means at their command I shall try my best to get the scheme sanctioned by Government and commence work in the year 1923-24 (Hear,hear & cheers) I am making rather a bold statement viz that I commit His Highness' Government to an expenditure for the water-supply scheme of Tumkur to the extent of a lakh and a half But I am no pessimist I believe that in the near future the dark clouds of financial difficulties that are hovering over this beautiful State would have passed away I believe that by the time I see the Budget figures of 1923-24 I shall be able to provide substantial sums of money for the -- improvement of towns which have I have to admit, been neglected in the past

DEPUTY COMMISSIONER DISTRICT 7 OCT 1922 7993

Mel86-22 — 2

Sir

Adverting to Government Order No L 650/Vl 1-21-2 dated 2.8.1922 regarding the water supply scheme of the Tumkur Town I have the honour to state that the question was reconsidered in view of the representation of the Dewan Saheb to the water supply deputation that met him at Tumkur the time of his visit in the area meeting held on the 11th Septr and it was resolved to contribute Rs 80 000/- immediately and to start work from the Municipal share at once, and further requested to grant a loan of one lakh of rupees at 6% free of income tax etc

The matter was placed before the Dewan Saheb during his visit in the August 1922 when after a full discussion of the situation the Dewan promised to sanction the scheme in the year 1923-24 and to start the work in this year alone with the Municipal contribution if paid at once

Under these circumstances the Council therefore requests that the Government may be graciously pleased to accord sanction to the estimate and the proposals contained in the resolution The amount of money will be palced at the disposal of Government after the receipt of the Government order

A copy of the resolution of the special meeting is herein enclosed for kind perusal

I have the honour to be

Sir

Your most Obedient Servant

S i r,

2nd 86-22-6

Adverting to your letter No.L 4190/M1 86-22-5 dated the 3rd December 1923 requesting me to go into the question of compensation re the scheme of water supply to Tumkur Town and furnish correct information in the matter and also to report on the petition from the ryots of Kyatsandra and other villages complaining against the reservation of the Maidala tank for supplying water to this Town I have the honor to state as follows --

(1) Except in the case of lands which are actually required for the pipe line etc it is proposed merely to convert nearly 200 acres of wet land into dry and not to acquire any land for Government unless the ryots raise any objection to this conversion, and want their land to be acquired outright in which case, the lands of such ryots will have to be acquired and sold again as dry The difference of value between the cost of acquisition of such land if necessary and of its selling value would represent the compensation that has to be provided for in the -- estimate

(2) The estimate provides Rs.45,000/- for acquisition of lands

and

nd nearly 200 acres may have to be con.erted into dry

(3) It is thus not possible and also not desirable to fix the compensation amount in a hurry as each claim will have to be dealt with, on its merits, after the lands actually to be thrown out of -- wet are definitely known from the Public Works Department The amount provided however seems ample

(4) No provision seems however to have been made in the estimate towards the capitalization of the loss to Government by the fall in revenue, due to conversion and in the note accompanying the estimate para 8, it is noted that this will amount a to nearly Rs 15,000/- which has been omitted from the estimate to keep down the cost From the revenue point of view at any rate it seems very necessary to charge the sum to the estimate

(5) It is proposed at present not to throw out any garden lands and by the storage of 300 units of water in the tank the springs as well as the level of water in the wells are sure to improve

(6) The ryots' liability towards the maintenance charges is -- limited to one year's assessment but as the tank is now proposed to be reserved for water supply, the ryots should be assessed at only -- half the charge

(7) It seems necessary to frame rules re the letting out of -- water from the tank and its future maintenance, as also the relationship between the Municipality and the ryots as the tank has to supply water to both It is also necessary to fix the quota payable by each towards the future maintenance of the tank as well as the feeders

(8) As it is possible that there might be friction between the Kyatsandra ryots and the Municipality it is desirable that the distribution and control of water should be in the hands of a Government -- Department

All the enclosures received with your letter are returned herewith

I have the honor to be

under the Mandala tank

Order no — L 8577-81
Exe Plans & Estimate to Chief Engineer

In the G.O read above, it was
laid down that the rough estimate of
Rs 2,6 84,11/ for the water-supply scheme
to the Tumkur Town be revised by the
Sanitary Engr and detailed plans and
estimates submitted to Govt In October
1920 the Chief Engr forwarded for
sanction a revised project
estimated to cost Rs 4,00,000/- The
Md Cl of Tumkur, to whom the project
was referred for consideration, stated
that towards the contribution of Rs
2,00,000/- payable by them, a sum of
Rs 70,000/- could be found immediately
and solicited sanction to raise the
balance of Rs 1,30,000/- by loan Govt
however ordered in Dec 1921 that on
account of financial stringency,
they were not then in a position to
make an allotment for their share of
the Cost- and that until they were
able to do so, it was not advisable to
pursue the matter further Now order

Tumkur Water-supply

Accords sanction to the —— scheme.

READ—

Government Order No. lt. 14736-38—Ml 324-15-7 dated 17th May 1919, according administrative sanction to the scheme of water-supply to the Tumkur Town from the Maidala Tank, one half of the initial outlay being borne by Government, the grant being spread over a period of three years and the other half by the Municipal Council.

2 Letter No. B 3091, dated 21st September 1923 from the Chief Engineer in Mysore, forwarding a revised estimate for Rs. 4,72,000 for the water-supply scheme.

3 Correspondence ending with letter No. Mlc. 111 23-24, dated 28th January 1924, from the Deputy Commissioner, Tumkur District furnishing his opinion in the matter of the compensation payable to the raiyats under the Maidala Tank

ORDER No. L 8577-81—ML. 86-22 7, DATED 24TH APRIL 1924

In the Government Order read above, it was laid down that the rough estimate of Rs. 2,68 411 for the water-supply scheme to the Tumkur town be revised by the Sanitary Circle and detailed plans and estimates submitted to Government. In October 1920, the Chief Engineer forwarded for sanction a revised project estimated to cost Rs 4.00,000 The Municipal Council of Tumkur, to whom the project was referred for consideration, stated that towards the contribution of Rs. 2,00,000 payable by them, a sum of Rs. 70,000 could be paid immediately and solicited sanction to raise the balance of Rs. 1,30,000 by loan. Government, however, ordered in December 1921 that on account of financial stringency they were not then in a position to make an allotment for their share of the cost and that until they were able to do so, it was not advisable to pursue the matter further This order was repeated in July 1922, when the Municipal Council pressed for a reconsideration of the matter

2 When the Dewan visited Tumkur in August 1922, he promised to sanction the scheme, so that work may be started during 1923-24, if the Municipal contribution was paid at once. The Municipal Council resolved in September 1922 to contribute Rs. 80,000 immediately to start the work from their share at once and to raise a loan of Rs. 1,00,000 at 6% interest The Chief Engineer who was consulted in the matter submitted a revised estimate for Rs. 4,72,000 and stated that the work could be completed in three years or earlier if funds could be provided

3 In August 1923, the First Member of Council visited Tumkur and discussed the water-supply scheme with the Chief Engineer, the Deputy Commissioner, Tumkur District and the Municipal Councillors at a special meeting convened for the purpose, the raiyats and other inhabitants of the villages near Maidala Tank, who have all along been opposing the scheme being also allowed to be present. The details of the scheme and the ways and means for meeting the Municipal share of the cost were fully considered at the meeting and the representations of the raiyats heard The tank in question was also inspected and it was found that there would be no insufficiency of water to irrigate the valuable arecanut gardens of the Kyathasandra village though some

lands in the tail end may feel the want of water and consequently will have to be converted into dry

4 Government have carefully considered this water supply scheme in all its aspects and are of opinion that it cannot be delayed any longer They are therefore pleased to direct that—

(i) The project and estimates as prepared by the Public Works Department be sanctioned subject to scrutiny by an expert to be appointed by Government

(ii) A grant equivalent to half the cost of the scheme be made by Government payment commencing from 1925 26 on condition that the Municipal Council finds the other half from its cash resources and the loan to be raised for the purpose and that it agrees to pay to the Government the difference between the wet and dry assessment on the extent of the land converted into dry

(iii) The expenditure during 1924 25 be met entirely from the Municipal quota of Rs 80 000 which the Municipality is prepared to pay in cash at once to be supplemented by a grant of Rs 20,000 to be provided for in the next year s budget

5 The Deputy Commissioner Tumkur District is requested to obtain from the Municipal Council draft prospectus for the floatation of the loan and submit the same for the approval of Government

To,

Mr Humza Hussein Sahib Esqr., B A, B L,
First Member of Council,
to the
Government of His Highness the
Maharaja of Mysore, Bangalore

May it Please your Honour,

We, the residents of Kyatsandra and the surrounding villages, who are the cultivators of the lands under the Maidala tank, utilizing the water of the said tank, beg to submit our humble petition, in continuation of our petition already submitted to your honour on the 30th day of July 1923, at Tumkur camp, and our personal representations made to your honour on 1-8-1923 - on the bund of the said tank, for the favour of your kind consideration, and immediate favourable orders

Our chief occupation is agriculture, as is the general case in the whole state The policy of the benigned Government of His Highness the Maharaja of Mysore is also to improve the agricultural resources of our state, and we are proud to note, that such works as promote the agricultural resources, are already taken up in the grand works of the Krishnaraja Sagara, Markanave, and etc

Our condition, of late, has been

reduced to such a hopeless state, as it deserves the sympathy and kind help of our benigned Government-

There is no year on record, during which, the Mandala tank has been full with water, since the past ten years. we, in the hope of getting good crops, at least at a future time, have run into very huge debts, (even to the extent of lakhs of rupees) in order that we might be able to provide our families with the necessaries of life, as well as to maintain our estates, together with paying up the annual land-revenues to the Government But, as the present state of affairs, even more than half of the rainy season - is already over, there is not even a month's supply of water in the tank, and the tank does not give us the faintest hope So, we humbly pray, that the benigned Government will not only help us from this precarious situation, by improving the water resources of the tank, but also refuse, any kind of additional use of water from the tank when the tank cannot supply us with enough of water for cultivation, even once in ten to twelve years, we are at a loss to know, how it can further hope to supply an additional quantity of water and help the public of Tumkur, in lessening their troubles, owing to scarcity of water we humbly pray - that your honour will be pleased to consider this point in

Finally, we beg to state, that we are completely aware of the situation of 20,000 brethren, who are the residents of Tumkur, and fully sympathize with them, in their troubles, owing to water-scarcity But, we leave it to the judicious decision of your Honour, to consider, that if it is reasonable, to cause the destruction of 40,000 of us, with the mere hope of improving the water scarcity trouble of our 20,000 brethren, by allowing them to utilize the water of the said tank by means of pipes to Tumkur

Hence, we humbly pray that your Honour will kindly be pleased, to consider all our representations, and give us an immediate and favourable endorsement, as promised in person, your Honour, both while you were at Tumkur, and on the tank bund, that you would send us a favourable endorsement from Bangalore camp

We remain,
May it please Your Honour,
Your Humble subjects of Kyat-
Sandra & the surrounding

To

The Just Collector

in Mysore, Bangalore

(Comp) Yours

Most Respected Sir,

We, the undersigned citizens beg to submit the following petition to your honour, with the anxious hope of your favourable consideration

We all belong to different villages near Medela — Nagasandra, Kesarmadu, Medela, Tunde halle, Pandetana halle, Hunekkal Kuppe, Resalepalya, Hatti Halle Palya, Gondayana Halli palya, Bhakkena halle, Hanuma halle, Sugana halle, Ramanna halle Basavanagada Palya, Karekal Palya, Basava Patna, Kalli halle, etc. As your honour knows, the great Lake which gives life to the name of the village Medela itself is a great source for water to wetlands around the above mentioned villages we pay a land revenue to the Government of nearly Rs 7000/- every year and your honour can easily conceive of the value of the yearly yield that is to be got from this land without the aid of water from this Lake, all our lands and farms would be wasteland so many thousand of people are suffering without upon land, and if we are left of the adventages of utilising what - little Medela Lake, we are destitute and helpless

The most popular and the honourable Deputy Commissioner of Mysore, has issued orders to the Medela Tank authorities to release water to the fields to enable cultivation to be carried on. But enough water would be given for the purpose

P T O

of wetlands around. This could be easily done however first, after raising the tank-bund; sufficient height for the storeage of water enough to meet the demand of the wet lands as well as the demand of the water supply to Tumkur the citizens gave our consent to the grand plan

We however now find that the water of the Hidala tank is scarcely sufficient for the cultivation of the wetlands around when as the case how can water supply be made to citizens of Tumkur from the same tank and venture most humbly, to suggest a plan out the difficulty

There is a river by name Jayamangla which is about 40 miles from Tumkur If the of this river is stored in a place near Devarayan patna, the stored water will be enough for the of water supply to Tumkur This undertaking, as can be readily seen, involves very little expense and the work may also be done very soon

The plan, if approved will the the above mentioned citizens of the villages from many an anxiety and trouble

We earnestly hope that our prayer be heard and our difficulty removed

We have the honour
Respected Sir,

your most obedient servt

Dated 30th July 1911
